Bio

Bente Skjøttgaard (b.1961) makes highly textured ceramic sculptures with an aura of equal parts toughness and her sense for an underlying poetic delicacy. She is constantly testing the performing abilities of the raw materials, the works relying on both her fresh, sketchy approach to modelling in the wet clay and the unpredictability of her firings with glazes at high temperatures. Out of her immediate control, the materials are left in the kiln to perform on the basis of her previous experiences and her infinite curiosity for new unexpected results. Bente Skjøttgaard keeps adding new highly personal chapters to the infinite story that culture and nature share, whilst continuing her exploration of ceramic possibilities.

His objects are artistic manifestations in which their functionality is not delineated. Bram creates architectural objects and installations in different scales, both within private and public contexts. His work often has a spatial role where it can influence people in their experience and interaction with their environment, or where an object creates a new space within the existing space.

Marcin Rusak (born in 1987, Warsaw, Poland) is an artist and multidisciplinary designer interested in ideas of value, ephemerality and aesthetics. Specializing in storytelling, process and material investigation his work often incorporates research, object and installation as well as visual creations to explore overlooked details of our lives which recreated and re-imagined are shown again in a different light.

As the son and grandson of flower growers he has long been fascinated by these natural sources of inspiration and decoration. Engaging them in his creative process began by reusing waste to investigate new decorative elements within every day objects and led to a rich body of work ranging from research and storytelling to cultural criticism around consumption and future scenarios.

Biography

Visual artists Fien Muller and Hannes Van Severen make their debut as designer duo Muller Van Severen in 2011. The duo explores the boundaries between art and design in a contemporary and innovative way and adopts an inventive, imaginative approach to functionality. They are constantly looking for new ways to make furniture more interesting from a sculptural point of view, without losing track of its functionality. They succeed wonderfully in adding a very personal, fresh new touch to major historical art and design movements.

Their oeuvre is characterised by an exciting tension between austerity and extravagance, lightness and heaviness, severity and playfulness, delicacy and sturdiness. Their fascination for materials, their sense of colour and proportions, their affinity with architectural space and their focus on the sculptural form all help create a fascinating universe. They eagerly follow their own path and experiment with new ways of using furniture, averse to fashions and trends, thus designing unique functional landscapes for living, permeated by poetry, imagination and aesthetics
