## Concept

The *Hi!breed* collection explores the personification of old chair frames with a sense of a life before. Kingsnorth finds inspiration in working with chairs that have been abandoned or are in need of repair. She moulds the foam directly around the frames in an intuitive lead process of addition and subtraction, physically sculpting out a character and rearranging new body parts in what appears to be an anthropomorphic happening. Each chair is encased in textile, selected and hand stitched or formed to exude the character it has become.
