VINCE PALACIOS

Ceramic vessel model "Serengeti"

From the series "Cave Vessel"

Manufactured by Vince Palacios
USA, 2025

Clay, Slip, Glaze, Various Flux, Multiple Firing

Measurements

43,2 cm (diameter) x 30,5h cm
17 in (diameter) x 12h in

Edition

Unique piece

Biography

Vince Palacios (b.1961) is an American ceramic artist born in Flint, Michigan. He received his Masters in Ceramic Art from the New York State College of Ceramics at Alfred University in 1994, and prior to that, in 1992, his BFA in ceramics at California State University at Long Beach. He has been working in the field of ceramic art since 1988.

Palacios has gathered extensive experience as a professor at different academic institutions, such as California State University of Long Beach and Western Illinois University, among others. He is now working as a lecturer in the Ceramics Department at El Camino College in Torrance, California.

His work has been exhibited worldwide and is included in a number of important private collections such as Alfred University Art Museum in New York as well as in the collections of remarkable museums, including the Long Beach Museum of Art, Long beach, California, and The AMOCA Museum of Ceramic Art in Pomona, California.

The development of Palacios' works is derived from unique approach points. Firstly, in the context of materiality, Palacios has a complex crafting process through the use of raw glass and ceramic materials. As a result of his multiplex material process, combined with the exploration of geological processes of pyroclastic interactions, heat and chemical reactions, the American ceramicist creates intricate and playful narratives.
